Wednesday 7:30 p.m.

A cordial welcome awaits you.

TOMBOLA WINNERS
AT ST. ANNE'S BAZAAR

Following are the tombola winners at St. Anne's annual bazaar, held in Columbus hall on November 27.

1—Ritchie Old, \$5 cash, ticket 87.
2—Mrs. Ben Hobson, 2 pair nylon stockings, ticket 1082.

3—Matt Liekovsky, \$5 cash, 1492.
4—Jack Tompkins, turkey, 1813.
5—Miss R. Manchuk, Cranbrook, \$5 groceries, 648.

6—J. Nabb, harscock, 1182.
7—Donna Michalsky, magazine end table, 1634.

8—Robert Lucenti, \$10 cash, 611.
9—Ethel Oles, \$5 cash, 727.

10—Louise Diamond \$5 dry cleaning, 1492.

11—Steve Perozak, crystal vanity set, 748.

12—John Schlosser, inlaid silver fruit bowl, 843.

13—Danny Pagnucco, \$10 cash, 1430.

14—Dona Dypolt, Frank, \$5 cash, ticket 21.

Mrs. J. V. McDougall, with ticket 614, won the comforter; and Mr. E. Houze, with ticket 538, won the doll.

IT'S SMART to buy Maxwell House Coffee in the Super-Vacuum Tin. Vacuum-packed by the Vita-Fresh Process, it's just as fresh as when it left the roasting ovens.

TO RE-VOTE ON HOSPITAL

The ratepayers of the Crows Nest Pass Municipal District No. 40 are to be asked to grant permission to the hospital board to issue debentures to the amount of \$275,000 to properly construct and equip a modern 60-bed municipal hospital. While no date has been officially set it is expected the vote will be taken in either January or early February.

When the original estimate was made in August, 1944, it was confidently believed that \$180,000 would construct and equip the building. Numerous obstacles have confronted the board almost from the outset causing serious delay in actual construction. The site, for instance, caused months of delay before it was finally secured. Sharp increases in the cost of material and labor has resulted in the construction and equipment soaring up to another \$90,000, this being practically half of the original estimate of \$185,000.

The hospital board sought the assistance of the Board of Public Utilities for the additional \$90,000 debenture issue but this has been refused, the suggestion being made to either go to the ratepayers for their sanction to the increase or to trim down the original plans and build a smaller hospital.

It is the considered opinion of the local hospital board that a smaller hospital for this large industrial area would prove inadequate and for that reason it is going to the ratepayers to sanction sufficient money to build a hospital that will be most suitable to the area's requirements.

Plans and specifications having been completed tenders were called for the construction of the hospital. Three tenders were received. Shoush Construction (Western) Ltd., Calgary, was awarded the contract on a tender of \$202,995.00. This in itself was more than the total hospital budget of \$185,000 authorized by the ratepayers on Dec. 16, 1944. In addition a breakdown of the equipment required revealed a cost of \$70,000 making a total of \$273,000 approximately.

During the two years the provincial and elected boards have been in office, money has been spent and accumulated. Should the ratepayers sanction the additional \$90,000, actual construction of the hospital will start "the moment spring starts to thaw the snow and ice on the site."

During January the hospital board plans a series of public meetings in all centres in the area to thoroughly acquaint the ratepayers with the progress made and the reason why the additional debentures should receive their support.

MAIL TO MONEY TO AUTHORIZED DEPOTS

In certain Alberta cities unauthorized persons are canvassing Tuberculosis Christmas Seals from door to door and keeping the money.

In case someone should come into Coleman and pull off the same practice, it is urged that householders immediately report the canvasser to the police. Christmas seals will be sent to many Colemanites through the mail. The money for those seals should be mailed to the depot whose address will be clearly shown on the envelope containing the seals. In this district the Lethbridge Kinamen have charge of the campaign.

FAMILY ALLOWANCES

Early filing of applications for the family allowance by all parents not already receiving the cheques in respect of their children, is urged by the department of national health and welfare, in order to avoid congestion and possible delay when the new Income Tax regulations come into force. The department suggests to those who do not wish to receive their cheques until commencement of the calendar year, that they indicate this fact on the application forms. These forms are obtainable at all post offices.

PASSING OF ALEX FYFE

Alexander Fyfe, Coleman's grand old man, passed away peacefully in sleep at the local hospital on Friday evening at 9:30 o'clock in his eighty-fifth year. He was predeceased by his wife on August 17 last and had grieved her loss during the past few months. Due to his advanced age his health was none too robust and he had been cared for by his four daughters. It was deemed advisable on Tuesday of last week to remove him from his daughter's, Mrs. Dave Robert, home to the local hospital. His family were at his bedside when the end came.

Born at Lethbridge, Forfarshire Scotland, Mr. Fyfe attended school and grew into young manhood in his native town. In 1918 at Arbroath he married Mrs. Fyfe and their family of four daughters were born there.

He was employed as a shepherd and worked over his flocks in the field before deciding to come to Canada. He was preceded to this country by his three eldest daughters, Mrs. George Ford coming to Bellevue, one while Mrs. Dave Robert and Mrs. Alex Morency came direct to Blairmore. In 1911 Mr. Fyfe came direct to Coleman where he gained employment at McGillivray Creek as stable boss, a position he held till 1916 when he took over a similar position at Internationals holding this position seventeen years until his retirement at the age of 72. Mrs. Fyfe and youngest daughter, now Mrs. R. Oliver joined him in 1913.

Despite their advanced age, they often thought of Bonnie Scotland, their old homeland and immediately following his retirement he and his wife departed for Scotland, bidding their family a fond adieu. Once in Scotland however and having visited scenes of their younger days the severance from family members proved too much and they returned to Coleman to be once more among their family. They rented a home on Fourth street and Mr. Fyfe spent all his time in growing a flower garden and took keen pleasure in watching his plants bloom.

Quiet natured, he was to be seen daily in the spring and summer mornings walking down town for his mail. He knew many and his broad Scottish dialect will be remembered by friends for a long time to come. Proud of his native land he took keen interest in the Caledonian Society which was last organized in Coleman by Rev. A. E. Larke. In 1942 he and Mrs. Fyfe were honored by the Caledonians on the occasion of their fifth anniversary. Mr. Dave Gillaspie, society president, presented Mrs. Fyfe with a beautiful bouquet of carnations. During the festivities the honored couple led the Grand March.

Surviving are his daughters, Mrs. Alex Morency, Mrs. Dave Robert, Mrs. George Ford and Mrs. Roach Oliver; 14 grandchildren and 9 great-grandchildren. Deceased was the last remaining member of his family, his last brother, predeceasing him a few years ago. Mrs. Fyfe was also the family.

Mrs. Ralph Sambalist and baby of Picture Butte and Norman Ford, Calgary Technical School student, were present for the funeral in addition to the other family members residing in the various Pass towns. The funeral was held on Monday

HILLCREST HAPPENINGS

A son, Douglas Kenneth, was born to Mr. and Mrs. K. Thornton on November 24, at Kortner's maternity home.

Mr. and Mrs. F. Ratko, of Calgary, formerly of Hillcrest, are receiving congratulations on the birth of a son in the Holy Cross hospital.

The members of the Busy Bee sewing club met last week at the home of Mrs. J. Brown, and at this meeting Mrs. R. Gardner's home.

Mrs. T. Graig Jr., of Pinche Creek, is visiting her at the home of her son, Mr. T. Graig and Mr. J. Craig.

Mrs. Earl McDonald and children, of Vancouver, are visiting here with Mrs. McDonald's parents, Mr. and Mrs. J. Ironmonger. Billy Ironmonger who has been at the coast for several months returned home.

Mrs. Mary Stunko, bride-elect, was the guest of honor on Thursday night at a miscellaneous shewer held in the Catholic hall. The large crowd enjoyed an evening of whist and bingo, after which a supper was served by the hostesses. After super tables had been cleared, Mrs. J. Hartford presented the guest of honor with the many beautiful gifts from those present, for which Miss Stunko expressed her sincere thanks and appreciation. Hostesses were Mrs. J. Hartford, Mrs. M. Wish, Mrs. R. Anderson, Mrs. Sank and Miss Edith Spence.

Mrs. W. H. Mosey and Teddy were

Calgary visitors the early part of this week.

"VV"

COWLEY HAPPENINGS

Mr. and Mrs. Ervin Feller, of Bellevue, are receiving congratulations upon the birth of a daughter, Kathleen, on Sunday, December 1st.

Mr. Harry Monday, of Vancouver BC, who is now visiting at the home of his son and daughter-in-law, Mr. and Mrs. Wilfred Monday, at Brocket, paid us a visit here on Thursday.

Since spending the month of October, November and December at the home of Mr. and Mrs. Malcolm McMillan, Mrs. McArthur left on Monday by train for her home in Buffalo, NY.

Mr. George Scotton entered St. Vincent's hospital, Pinche Creek, on Monday for an operation.

A daughter was born to Mr. and Mrs. Arthur Gray in Calgary hospital on Saturday, November 30th. Congratulations!

Mrs. Victor Lewin, of Port Hawley, is now paying a visit to her parents, Mr. and Mrs. C. J. Bundy here.

Our deep snow is fast disappearing with the mild wave and soft chinook winds of this week. We're grateful! Cars are seen now on country roads occasionally following a backlog of highways with the recent heavy snow. For several days farmers came to town in sleighs and it was tough sledding for a while.

A truck and a Boston-bound passenger train collided at a grade crossing at Newburyport, Mass.

The truck driver and the train engineer confronted each other, but there was no exchange of sharp words.

"Hello son," said Charles Morrison, 63, the engineer.

"Hello pop," said Stanley Morrison, 33, the truck driver.

There were no injuries.

Afternoon, services being held in St. Paul's United church with Rev. Dr. Magowan conducting. Hymns sung were the same as those sung at Mrs. Fyfe's funeral service, "Jesus, Lover of My Soul" and "Rock of Ages."

The pallbearers were also the same as those who officiated at Mrs. Fyfe's funeral; four sons—Lester, D. C. Robert, George Ford, R. Oliver and Alex Morency, and two grandsons, Ronnie Fyfe and Norman Fyfe, last member on her side of the family.

The funeral was held on Monday

COST OF CONSTRUCTION

As all are aware the Pass is trying hard to get a modern municipal hospital. When the project was first started back in August, 1944, the cost of constructing and equipping a sixty bed hospital was estimated at \$185,000. Today the cost for the same building and equipment stands at \$275,000.

We are indebted to The Canadian Bank of Commerce's monthly commercial letter which deals with the subject of construction costs. Its survey it taken on a national basis and reads:

Cost of Construction

The most complete cost study yet made is that recently completed by the department of reconstruction and supply, Ottawa. This valuable analysis was undertaken as part of an expensive survey of housing requirements, with the aid of engineers, architects, practical builders, economists and statisticians. The result of the cost study are summarized below.

Taking all factors into account—the increase in materials and wages, as well as the lowered efficiency of construction workers—the total costs are estimated by the department to have gone up between 47 and 62 per cent from 1939 to 1945.

It should be emphasized, however, that the increases are national in scope. Considerable variations are apparent in different sections of the country. We know of points where building costs have risen 75 per cent over 1939. Thus it should be stressed that prices of building materials entering into all of these calculations are those in legitimate trade circles.

The present high cost and low efficiency of labor are due partly to pre-war and war conditions. During the period 1921-39 house-building activity in urban areas in Canada averaged 32,000 units per year, ranging from 50,000 in 1928 down to 14,000 in 1933. Work in the construction industry was highly irregular, with the result that young men sought employment as carpenters, stonemasons and bricklayers, but in other forms of endeavour. Thus the construction labor force, having failed to receive an adequate number of young recruits for fifteen years (less than 200 per year in the 1930's) became older with an inevitable accompanying loss in efficiency. By 1941, the last census year, 67 per cent of persons working in construction occupations were 35 years of age or over, as against 49 per cent of all persons gainfully employed. During the early years of World War II there was a tremendous boom in construction of war plants of all kinds, but the proportion of young men in the new labor force was low due to the requirements of the armed forces and more attractive working conditions in munitions plants. At present the construction industry is recruiting and training new men as fast as it is able, but the fact remains that the cost of building houses in Canada has increased by lack of sufficient skilled men. This phase will pass, of course, as the new recruits increase in experience and knowledge and take over from their predecessors.

SANTA CLAUS?

I wonder if it is the spirit of Xmas that does it? Or could it be that those "Xplorers boys" are really waking up to the fact that good behavior pays?

Whatever it is I know we had a very enjoyable evening at our last meeting. In place of going to bed with the usual headache after a session with these lovely, if high spirited scamps, I found I suffered from insomnia brought on by sheer surprise and delight at such an accident-free, slug-ging minus meeting.

"Thank you" boys, may our future gatherings equal this one in pleasure and accomplishment. Group Leader, Bambi sr.

Saturday, Jan. 18—High River vs. Blairmore; Okotoks vs. Coleman.

Monday, Jan. 20—Okotoks vs. Vulcan; Macleod vs. High River; Nanton vs. Okotoks.

Wednesday, Jan. 22—Coleman vs. Macleod; Blairmore vs. Stavely; Okotoks vs. Vulcan.

Friday, Jan. 24—Blairmore vs. Macleod.

INCREASE YULE MAIL SERVICE TO PASS POINTS

The towns of Macleod, Pincher Creek, Bellevue, Hillcrest, Blairmore and Coleman and the cities of Fernie and Cranbrook are to have their mail services doubled during the Christmas season, post office authorities have announced.

From December 17 to December 24 inclusive, mails will be despatched to and received from these offices along the Crows Nest Pass train travelling through to Yoho, which leaves Lethbridge at 9 a.m. and arrives from the west at 6:10 p.m. each day. Under this arrangement the points mentioned will receive two mail services per day, instead of one as at present.

The double-barred cross is the emblem of the campaign against tuberculosis.

The Effect Of Strikes

THE CRIPPLING EFFECT OF STRIKES on Canada's industrial life and on the success of the reconversion program here has been felt in many places. Shortages of materials resulting from these work stoppages have been responsible for a series of price increases in the cost of many articles from food to clothes, and from men's shirts to soap and glass. As long as critical shortages exist it is clearly in the interest of consumers to maintain price ceilings and other wartime controls, since to lift these before the supply is equal to the demand, would be to invite disastrous inflation. In spite of controls, black markets have sprung up in some parts of the country in nails, lumber and other articles in short supply, and it is apparent that a normal peacetime economy will not be restored until production can go forward without hindrance.

Decline Seen In Industry

The full effect of strikes on the life of the Canadian people was pointed out recently in an address delivered in Winnipeg by Rt. Hon. C. D. Howe, Minister of Reconstruction and Supply. At that time Mr. Howe told of the manner in which steel and coal strikes in the United States followed by the lake shipping strike, the strike of lumber workers in British Columbia, the soda ash strike in Ontario and the prolonged strike in the Canadian iron industry allowed down considerably the manufacturing and other vital industries which had been expand to meet the heavy demands for goods after the war. "The expansion process, which had begun in March, started to falter in May, as a result of the strikes," Mr. Howe said, "and since then there has been a decline in many industries."

Interests Of Many Affected

In solving the problems which have arisen as a result of the strike situation, Mr. Howe suggested that a spirit of co-operation and mutual aid is needed among all those whose interests are involved. Those whose interests are affected include a large group, not only labour, management and the government, but producers and consumers throughout the country whose business interests and standards of living are affected when strikes are declared. All Canadians, no matter what group they represent, look to full employment and a high standard of living as a basis of security and progress in the years to come. In the words of Mr. Howe, these can only be achieved by "new and vigorous types of co-operative action between federal and provincial governments, between management and labor, and between government as a whole and industry as a whole."

SMOKERS CAUSE BRIDGE TO CATCH FIRE OFTEN

SYDNEY, Australia.—The 1,650 ft. long single span bridge across Sydney harbor catches fire on an average of once a week. The fires occur in the wooden decking of the rail track section. The flames cannot be extinguished butts which lodge in crevices jammed with old train tickets and are fanned by wind. It has become necessary to increase the number of hydrants to one every 100 feet.

MATCH LIGHT UNDER WATER
OCEAN CITY, N.J.—A convenience afforded to service men during the war soon will be available to civilians. The match company has begun the manufacture of water-resistant matches at the rate of 7,500,000 daily. The matches, which will light even after complete submersion for four hours.

Corporal Punishment

MCGILL Psychologist Emphasizes Psychological Methods

A child who is physically and emotionally unstable will not benefit from corporal punishment, rather he will suffer unnecessarily, declared Mrs. Edith M. Willis, child psychologist, in a statement issued in connection with her talk on "Child Development" at McGill University.

Mrs. Willis, a graduate of Stanford University, in an interview recently, advocated spanking as one form of punishment which would be used effectively in certain cases. In her statement she emphasizes positive methods of securing discipline, such as rewards and praise.

"Reward and punishment, she stated, are both part of a plan of discipline. If 'corporal punishment is used,' she said, 'it should be used discriminately with a child who is old enough to comprehend what is being done to him.'

"It should not be done to free the adult of emotional states, such as anger. The punishment should be carried out at the time the act is going on."

"Rewards which have a close association with the act, and which are not given in the form of bribes, are good. Perhaps the simplest and yet most effective way is social recognition in the form of praise."

"It should be remembered that a good plan of discipline teaches the child to conform to the socially desirable acts."

"Punishment can be of great harm to children if the adult does not understand fully children's motivation and also the fact that they are unable to understand as adults."

"Punishment is only a small part of discipline, and children cannot be demanded more of the adult's methods of using it, making it an unhealthy means and often an unhealthy way of teaching children."

THAT'S WHAT SHE THOUGHT

Soldiers' "has such profound banking knowledge been exhibited as was reported recently of a woman who walked into a bank and asked for a cheque book. "I lost the one you gave me yesterday," she said, "so I took care of all the cheques as soon as I got it—so naturally, it won't be of any use to anybody else."

THE HEART AT FORTY

While life may "begin at Forty," medical science knows that, after that age, more people die of heart disease than from any other single malady. The Department of National Health and Welfare, in its annual report on special cases of the health service in which he told of a chimney-sweep who called himself a "fumonist" and charged sixpence more than an ordinary sweep.

Price Control And Rationing Information

Q.—Has the price of prunes been increased?

A.—The Wartime Prices and Trade Board has announced a freeze on live prunes, price per pound, at the current price of 15c. This increase reflects the recent uncontrolled price rise in the United States, the Board said.

Q.—How many sugar-preserves coupons become valid in the month of December?

A.—There will be three sugar-preserves coupons valid in December. S36 is valid on December 5 and S37, S38 become valid on December 18.

Q.—Is it possible for a civilian to purchase a suit without a priority suit certificate?

A.—After October 30 no priority suit certificates were issued for the purchase of garments. The certificate issued previous to October 30 would be honoured until the end of December, and thus after that date ex-servicemen and civilians will stand an equal chance in purchasing their suits.

Q.—I am planning on selling my business and as I handle rationed commodities I would like to know if it is necessary to advise the Royal Administration of this.

A.—Any change in the ownership of a business which handles rationed foods must be reported immediately to the local branch of the Royal Administration.

Q.—Please send your information on your report to "Consumers News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Harassed Minds

Psychiatrist Says First Twenty Years Of One's Life Is Most Critical

MONTRÉAL.—The first 20 years are the hardest, and the most critical one less so, according to the two decades may modulate his feelings of anxiety and guilt for the rest of his life.

This was emphasized by Dr. Ewen Cameron, director of the Allan Memorial Institute of Psychiatry, in an address at a recent meeting in St. George's School, Westmount.

"All of us," he said, "know people who are crippled by anxiety, who cannot make decisions, who take jobs far below their capacity because they cannot stand responsibility."

"All of us know people who are harassed by feelings of guilt over the most trivial things, who are so excessively scrupulous that they can never feel their work adequately completed, so conscience-ridden that they cannot have normal and happy relationships."

Dr. Cameron fixed the responsibility on parental and other teaching.

"There is no evidence that the infant is born with guilty feelings about anything. Two-year-olds lack the ability to comprehend what is being done to them."

"It should not be done to free the adult of emotional states, such as anger. The punishment should be carried out at the time the act is going on."

"Rewards which have a close association with the act, and which are not given in the form of bribes, are good. Perhaps the simplest and yet most effective way is social recognition in the form of praise."

"It should be remembered that a good plan of discipline teaches the child to conform to the socially desirable acts."

"Punishment is only a small part of discipline, and children cannot be demanded more of the adult's methods of using it, making it an unhealthy means and often an unhealthy way of teaching children."

COULD CHARGE MORE

People have allowed themselves to be "bewitched by words," Robert H. Hyde, director of the British Industrial Health Research Board, said in a recent speech.

Consciousness of right-doing brings its own reward; but not amid the sense of battle in merit seen and appreciated by bookers-on. — Mary Baker Eddy.

Merit is never so conspicuous as when coupled with an obscure origin, just as the moon never appears so lustrous as when it emerges from a cloud—Bovee.

COULD CHARGE MORE

People have allowed themselves to be "bewitched by words," Robert H. Hyde, director of the British Industrial Health Research Board, said in a recent speech.

CANADIAN EGGS BECOMING HEAVIER

Thanks To Experts In The Poultry Division

This is the story of the humble Canadian egg—the eating kind, of course—which is gradually moving into the heavier weight class.

That means, just in case it slipped by your notice, that the egg you ate for breakfast this morning was heavier, healthier and better looking than those you had five, 10 or 20 years ago.

Chances are that it had a tougher shell, though it wouldn't actually bounce if you dropped it, and that the "white" was thicker, too, which means tastier-looking eggs for those who like them poached.

Chances are that it had a tougher shell, though it wouldn't actually bounce if you dropped it, and that the "white" was thicker, too, which means tastier-looking eggs for those who like them poached.

BACKACHE

The Plague of Outdoor Men

The outdoor man, whether he is a farmer, truck driver, or railway operator, is often subject to backache. This may be the result of exposure to cold and dampness or the results of strain from the jolting and bumping of the vehicle he uses.

To men, women, women as well as men, it would be great relief to have a backache—one of the most common and annoying of ailments.

The experts say that the kidneys are inclined to action when the body is exposed to cold and dampness.

The treatment suggested is Dr. Chase's Kidney Liver Pills. By reason of their stimulating action on both the liver and kidneys, you have two chances to one of getting rid of backache.

Statistics Show That Canadians Spending Plenty

OTTAWA.—Heavy spending engendered by high wartime salaries is continuing in Canada and as yet there is no sign of any let-up, a survey disclosed.

A Dominion bureau of statistics report on retail sales in September indicated that spending is increasing, possibly as a result of more consumer goods becoming available.

Price control figures in the report—the latest available—was the best indication of what Canadians were doing with their money.

The officials were commenting on a Sydney, Australia, dispatch which said a special order which came in Australia with the end of the war is petering out and people have become sparing both in their pleasures and domestic purchases.

A source in close touch with the business world said that "Canadians were having a great time" and that while Canadians were spending a lot of money on non-luxury goods they were also paying a good deal for entertainment purposes.

For instance, preliminary figures showed the apparent consumption of alcohol in Canada was up 50 per cent. higher this year than in 1945.

Despite the expenditures, a savings bank statement showed savings deposits still are rising. At Sept. 31 the savings on deposit totalled \$3,624,165,000 against \$3,465,731,000 at April 30 and \$2,934,845,000 on Sept. 30, 1945.

A report on the sales of Canada savings bonds showed that Canadians purchased close to \$500,000,000 worth in the first 30 days after the issues were opened.

The bureau of statistics report indicated that in September Canadians purchased more than just about everything, except shoes. Retail sales generally were 11 per cent. higher, but shoe sales were down two per cent. The Christmas season is expected to bring a market increase in retail sales and of spending generally.

STUDY NEW PLAN OF GRADING WHEAT

Board of Grain Commissioners Investigating On Protein Basis

CALGARY.—The board of grain commissioners is investigating the possibility and practicality of grading wheat on a protein basis. Dr. D. A. MacGibbon, assistant commissioner of the board of grain commissioners, told the Alberta wheat pool annual meeting at its opening session here.

D. G. MacKenzie, chairman of the board, is head of the investigating committee said Dr. MacGibbon.

If protein grading is established, he said, the present system might have to be discarded or the system retained with protein content added as a factor and perhaps new grades specified.

He said the present grading system recognizes protein content to some extent as it specifies a predominance of hard, red, vitreous kernels in the top grades and such wheat is usually high in protein. On the other hand, soft, pliable wheat that is present is penalized and that class of wheat is low in protein.

Grading on a protein basis would be injurious to northern districts, Dr. MacGibbon said, and particularly to northern Alberta.

There would be physical difficulties in operating protein grading and it would be more expensive, Dr. MacGibbon said.

Soil content and rainfall are major factors in determining that protein content of wheat, it was explained.

YOUNG VETERANS

Have Crowded Canadian Universities Anxious To Complete Education

OTTAWA.—Young Canadians who have stopped attending college because now number more than the Dominion's whole university student body of pre-war days, it was disclosed.

Scattered in 29 universities from coast to coast, veterans pursuing college classes total 35,000, and the department of veterans' affairs said this number was expected to hit 40,000 next year as more complete matriculation studies. Included are about 2,000 foreign students with the Dominion.

An additional 30,000 and there were about 16,000 veterans in their first year at university, 12,000 in second year, 4,000 in third year and 2,000 in fourth. Another 1,000 are taking post-graduate courses. In addition, there are 800 Canadian veterans studying in the United States and 200 in Great Britain with the department's assistance.

Veterans enrolled in the University of Toronto total 9,700—more than one-fourth registration in Canada.

Other colleges:

University of British Columbia, Vancouver—4,700; McGill, Montreal—3,200; University of Manitoba, Winnipeg—2,900; University of Saskatchewan, Saskatoon—2,400; University of Alberta, Edmonton—2,200.

WINS NOBEL PEACE PRIZE

Co-winner of the Nobel peace prize for 1945 is Louise Albritton, 27, a frail little woman who is undergoing treatment at the Newton-Wellesley hospital Wellesley, Mass. "This is not an award to me," she said after reading the cable telling her of the honor. "It is an award to the organization in which I worked so long, the Women's International League for Peace and Freedom."

\$500,000,000 In Gratuities Paid To Personnel

OTTAWA.—Former members of Canada's fighting forces have drawn around \$500,000,000 in gratuities and re-establishment credits, a survey of the services showed.

Close to 1,000,000 men and women have obtained benefits, it was shown, with the survey comprising the combined totals of the other two branches, both in numbers of beneficiaries and in the aggregate sum received.

The grand total involved to date—which includes applications already approved and those still pending—is approximately \$570,700,000.

This is made up of \$492,850,000 in gratuities payable directly to discharged service personnel in cash and another \$83,850,000 in re-establishment credits available for the purpose of buying business equipment, household articles or the like.

Besides the total for re-establishment credits, further large sums have been paid out in putting veterans through college or technical training and in aid under the Veterans' Land act. The totals for these were not available.

One-time army members so far have collected about \$300,000,000. The total number of cases approved for payment by the army is 165,361. Of these, payment has been made to all but 76,431, and these are being paid off now.

In the navy, 103,389 applicants—including some 6,000 dependents—qualify for a total of \$12,800,000 in gratuities. A navy spokesman said it was expected all applications would be cleared up by the end of the year except for those serving in the interim force, who would be finished up by about next September.

For air force personnel have made 226,223 gratuities applications with a total payment of around \$150,000,000.

HONORS CANADIAN

Bust Of Sir Charles Saunders Unveiled At Experimental Farm, Ottawa

OTTAWA.—The man who developed the wheat that made Canada famous—Sir Charles E. Saunders—was honored in a ceremony at the central experimental farm here when his bust was unveiled in a building bearing the name of his father, William Saunders.

Sir Charles, who died in Toronto 10 years ago, was known as the developer of Marquis wheat. He also evolved other varieties such as Preclude and Garnet. He is credited with originating the first important steps in plant breeding in Canada, and agriculture department officials estimate that his Marquis wheat has brought savings of \$20,000,000 a year to the Dominion.

UK. RATIONS TO CONTINUE

LONDON.—Indications that food rationing in Britain will continue for at least another 1½ years came from Rt. Hon. John Strachey, Food Minister. He told a questioner in the House of Commons that ration books through July, 1948, are being printed.

SHOES FOR GERMANS

BERLIN.—Britain is to provide the British zone in Germany with 95,000 pairs of shoes and it is possible that all shipments will be delivered to hard-hit areas by the end of the year, the control commission stated.

PRairie Farmers To Receive Additional Cash On 1945-46 Crop Delivery

OTTAWA.—Trade Minister MacKinnon announced the completion of arrangements for the payment to prairie farmers of an additional 10 cents a bushel on wheat delivered in the 1945-46 crop year.

In a statement, Mr. MacKinnon said the adjustment would mean the distribution of more than \$23,000,000 to producers in the prairie provinces but did not indicate when the payments would start.

The payment results from the new wheat price legislation introduced by government last July under which the initial payment on wheat was increased from \$1.25 to \$1.35 a bushel, retrospective to the 1945-46 crop year. The payment then applies to producers who delivered wheat to the Canadian grain elevator between Aug. 1, 1945, and July 31, 1946.

Mr. MacKinnon said the payment would be made out of the wheat board surplus on 1945-46 operations.

He added that producers would receive the payment from the local elevator agents. When the payment is made, the producer will surrender his 1945-46 producer certificate and will receive instead an official receipt which he should retain in case further payment is made on board operations during the 1946-47 crop year.

The original producer certificates as surrendered by producers will be forwarded to the head offices of the elevators and companies making the payment and later will be transferred to the board.

Mr. MacKinnon stressed that "under no circumstances" should producers send their 1945-46 certificates to the head office of the board as the payment would be made through the local elevator agents.

He said the board now has made available to producers approximately \$128,000,000 during the last 30 months in payments in connection with the 1940, 1941, 1942, 1943 and 1945-46 crop years.

Noah used petroleum, in the form of pitch, in building his ark.

FAVOR PLAN

Manitoba Municipalities Approve Car Insurance On Compulsory Basis

WINNIPEG.—A resolution urging the Manitoba legislature to put on a compulsory basis and that be imposed and controlled by the provincial government was approved by delegates to the 43rd annual convention of the Union of Manitoba Municipalities here.

The resolution, which included one asking that the provincial government pay a portion of the liquor control commission profits to the municipalities as a grant to enable them to keep roads in repair.

Delegates approved a resolution asking that the provincial government be required to increase legislative grants to an amount sufficient to pay 50 per cent of the cost of rural education throughout Manitoba.

FISHERMEN HAPPY

All-Time Record Price Being Paid For Lake Winnipeg Whitefish

WINNIPEG.—Lake Winnipeg fishermen will receive approximately \$400,000 for whitefish produced during the current fishing season, Resources Minister J. S. McDonald of Manitoba said here.

An all-time record price of 19 cents a pound will be the unit price for the 1946 catch, he said. The gross amount to be paid to fishermen for the 1946-47 year is \$1,000,000.

Previous record amount was \$35,000 in 1945 when 15-cents-a-pound was paid.

SUIT ESPECIALLY VALUABLE

CHICAGO.—Benjamin Kolkey told police here that a burglar broke into his home and stole \$1,000. He expressed hope the officer would find one of them, which he described as especially valuable. In one of the pockets, he said, was \$800 in cash.

Regarding former members of the Foreign armed forces arriving in the United States, he said, "There is no law in Canada which compels anyone to comply with an order on the part of a foreign government to register at its diplomatic or consular officer."

Regarding former members of the Foreign armed forces arriving in Canada, he said, "There is no law in Canada which compels anyone to comply with an order on the part of a foreign government to register at its diplomatic or consular officer."

"The main competitor that we have for avia-able transportation has been the coal movement to and within eastern Canada. One cannot be critical of those who have sought to secure transportation requirements in a relatively large scale for a deferred movement of this commodity which was essential to the heating of homes and the maintenance of industrial production during the winter months."

"Ever since sufficient wheat became available in the western prairies in Alberta, we have had a large supply for shipment to the Pacific Coast. This movement has been running at near maximum levels... In 1945-46 we shipped about 67,000,000 bushels of wheat through Pacific coast ports. We hope to do something better this year."

Mr. McIvor said that under the circumstances of a current tight supply position and the possibility of future changes in the policy of the wheat board, it is recommended a policy of selling its wheat as rapidly as it can be placed in export position.

"Such a policy is reassuring to those countries which are obtaining Canadian wheat and their interest in it will be maintained. It also ensures that Canada will not be over-stocked with wheat when the present sellers' market is over."

Canada's Wheat Beat World Food Problem

CALGARY.—Canada and the United States together exported about 750,000,000 bushels of wheat, including flour, in the year ending June 30, 1946, George McIvor, chairman of the Canadian wheat board, said in an address to the Alberta wheat growers here.

This constituted the largest wheat export in any 12-month period in the history of the north American continent and in addition to these supplies of wheat, both countries supplied quantities of other grains for human consumption.

"It was this unprecedented effort on the part of Canada and the United States which broke the back of the world food crisis of 1945-46. The world food problem of last year—one of potential hunger and starvation—was reduced to a problem of inadequate rations in many countries—but the worst that could have happened did not materialize."

Transportation has determined the board's attitude in regard to delivery quantities so far this year, he said.

"With respect to shipping on the Great Lakes we will not have an adequate stock position in eastern Canada with which to provide for the requirements of our domestic mills and to provide for exports from Atlantic ports due to the winter months. Two years ago we had 127,000,000 bushels of wheat in the east at the close of navigation. Last year we had 90,000,000 bushels. This year we will have 40,000,000 bushels. This is the largest annual reduction of all Polish nationalities in the Dominion."

"It should be clearly understood," the department said, "that under Canadian law no one in this country need present his registration at the Polish legation unless he wishes to do so. There is no law in Canada which compels anyone to comply with an order on the part of a foreign government to register at its diplomatic or consular officer."

"The main competitor that we have for avia-able transportation has been the coal movement to and within eastern Canada. One cannot be critical of those who have sought to secure transportation requirements in a relatively large scale for a deferred movement of this commodity which was essential to the heating of homes and the maintenance of industrial production during the winter months."

"Ever since sufficient wheat became available in the western prairies in Alberta, we have had a large supply for shipment to the Pacific Coast. This movement has been running at near maximum levels... In 1945-46 we shipped about 67,000,000 bushels of wheat through Pacific coast ports. We hope to do something better this year."

Mr. McIvor said that under the circumstances of a current tight supply position and the possibility of future changes in the policy of the wheat board, it is recommended a policy of selling its wheat as rapidly as it can be placed in export position.

"Such a policy is reassuring to those countries which are obtaining Canadian wheat and their interest in it will be maintained. It also ensures that Canada will not be over-stocked with wheat when the present sellers' market is over."

FEED GRAIN DROP

Agriculture Minister Gardner Urges Eastern Farmers To Increase Production

NIAGARA FALLS.—Agriculture Minister Gardner predicted a dwindling supply of western feed grains for eastern consumption and urged eastern farmers to increase their own production of feed if they hoped to maintain the present output of live-stock and dairy products.

In an address to the annual convention of the Ontario Creamery association, Mr. Gardner observed that production of feed grains had been lower in eastern Canada in recent years than immediately before the war while output has been higher in western Canada.

CONTINUES POPULAR

People Know Canada Savings Bonds Are Good Investment

OTTAWA.—Subscriptions in the first month of sales of Canada Savings Bonds amounted to \$467,228,850. Subscriptions in the first war loan totalled \$250,000,000 and in the second \$324,945,000.

Biggest previous war loan was the \$2,000,000,000 Ninth victory loan in 1945.

TOURIST REVENUE

TORONTO.—The Canadian tourist business increased 26 per cent. in 1946 in comparison with 1945 and probably resulted in 15 to 20 per cent. of Canadian tourists, according to Leo Dolan, chief of the travel and entertainment travel bureau said in an address to the Advertising and Sales club.

X-ray pictures now can be made through a foot of steel. 2701

SCIENTISTS PLAN "ATOMIC EDUCATION" FOR PUBLIC — U.S. scientists have launched campaign to raise \$1,000,000 through public subscription to finance nation-wide educational plan on the social implications of atomic energy. BRIDGING MOUNTAIN

NATIONAL PARK

When the Great Architec flattened out the prairie lands of Manitoba He did not forget to provide a playground for the millions who would eventually occupy these fertile plains. So he left a high plateau in a central location, 1100 feet above the surrounding country, dotted it with lakes and farms, adorned it with green trees and flowers, and pastures, enlivened it with the songs of birds, and turned loose in it many species of wildlife to roam and propagate in the protection of the forest.

In the course of time these fertile plains were settled and uncultivated, and poured forth their wealth in generous measure. Mile by mile the frontier was pushed farther northward. But wisely this natural playground high up on the Manitoba escarpment, called Riding Mountain, was reserved as a national forest and later established as a national park.

As might be expected this park soon became a popular playground for prairie dwellers. To its amenities were added recreational facilities including a golf course, hotel accommodation, bungalow camps, tourist cabins, camping grounds and summer cottages. More than 50 miles of motor roads and another 50 miles of secondary roads have been constructed, and more

than 100 miles of trails through the forest opened up. These forests, which have been under scientific management for more than a quarter of a century before the area became a national park in 1929, and cover most of the 114 square miles comprising the park, are its chief asset.

As time went on the name Riding Mountain National Park became known throughout the length and breadth of Canada and across the border in the United States. Visitors who once enjoyed a holiday in this park came back again and brought their friends. First they came in hundreds, then in thousands, until all available accommodation in the park was filled to capacity. During the past summer nearly 160,000 visitors, mostly Canadians, entered the park gates making the accommodation problem more acute than it has been for many years. The pressure on existing facilities was extremely heavy at times and it was necessary to curtail somewhat the use of facilities such as electricity which is developed by a diesel plant within the park area. The plant was operated at full capacity during the past season but proved inadequate to meet the requirements of this popular recreational area.

The result of this increase in visitors means that more accommodation will have to be provided before the beginning of the next tourist season and consequently there will be a still greater demand for electricity and other park facilities. To meet this greatly increased activity and in the interests of the comfort and convenience of visitors the federal minister of mines and resources, Hon. J. A. Glen, has announced that his department will build a power line from Erickson, which is the present terminus of the Manitoba Power Commission's line, to Wasagaming, the Park townsite.

Other less pressing facilities will be extended as soon as the supply of materials becomes more abundant. In the meantime campground accommodation is being prepared to take care of the increasing number who bring

along their own camping equipment. Canada, Riding Mountain is a wild ground should not be handed down and spent their holidays under care life sanctuary as well as a conservation area and will be preserved and maintained for the use of present and future generations. In the years that lie ahead millions of visitors will find quiet rest and healthful recreation within its borders, thus fulfilling the purpose for which nature in her wisdom has created it. Only a comparatively small part of its total area has as yet been developed to any extent, there is thoroughly enjoy themselves during plenty of room for the expansion of their stay in the park.

Like all other national parks in no reason why this popular play-

ground should not be handed down from generation to generation and in much the same state of natural unspoiled loveliness as the visitor to Riding Mountain National Park enjoys today.

Mr. Smith and the Legion...

The Legion is composed of Canada's best citizens. It is here to serve ALL Canadians.

YOU NEED THE LEGION!
Join THE CANADIAN LEGION
THE LEGION NEEDS YOU!

Young Mr. Smith is going back to school. Young, only 27, yet pretty old for high school. It's going to take courage. But Mr. Smith proved his courage when he was Private Smith, a Bren-gunner. Young Mr. Smith is going to amount to something.

Behind him stand his Legion comrades. Proud of him and determined to see that he has every chance.

"Breakfast is Ready!"

IT TAKES many months, and many people, to "get" a Canadian breakfast. Your coffee may be brought from South America, your tea from the Far East. Your table linen may have come from Ireland, your cutlery and china from England, your oranges and grapefruit from the United States and from the British West Indies.

Canadians buy from people of many races—and sell to them—all over the world. Indeed, a third of every Canadian's earnings comes from selling to people in other countries.

In this trading we do not always sell to the people from whom we buy. That is why we have to find customers.

To assist in finding both buyers and sellers, Canadian banks maintain branches or correspondents all over the world. They gather valuable information about people and markets abroad. They place this at the disposal of Canadian merchants, manufacturers and marketing agencies, introduce them to likely customers, and handle the "paper work" involved in transferring goods and money.

**WINTERIZE
against WINTER ICE**

REMEMBER that cold sleeting day last winter when your car wouldn't start? Well, this year, why not profit by past experience? Ride out the winter safely, comfortably, conveniently, and economically by having us "winterize" your vehicle *now*. No matter what make of car or truck you drive, our skilled service-men are equipped with the "know-how" and experience to make it weather-worthy—to put its cooling and lubricating system, its battery, engine and accessories in perfect running shape for the icy months ahead. Be prepared! Be protected! Make an appointment today for an all-round winterizing job.

**GENERAL MOTORS
DEALERS' WINTERIZING**

Includes—

- Cooling system service**—
Checking the cooling system.
Adjusting fan belt and inspecting for wear.
Inspecting hoses and tightening all connections.
- Winter Lubricants**—
Checking the engine oil.
Inspecting the water pump.
Examining the thermostat for type and operation.
Filling with anti-freeze.
- Engine tune-up and
battery service**—
Testing battery for strength and checking for connections.
Cleaning and tightening electrical connections.
Checking operation of choke and heat riser.
Testing generator and regulator.
Checking fuel strainers and carburetor.
Changing the engine oil.
- A thorough check
of all accessories**—
Testing heater and defroster operation.
Examining operation of windshield wiper.
Testing oil lights.

**HAS NEW IDEA**

Doctor Thinks Everyone Should Work As Long As They Like
CLEVELAND, Ohio.—The population of the United States, the statistician said, will be 180,000,000 by 1980—and this number is expected to include 21,000,000 in the 65 and over age group.

Such a prospect brought an appeal by one medical expert that science should do something about the aging and chronically ill. Dr. Hermann Klumpp, former chief of the food and drug administration of the U.S. department of agriculture, believes that a man or woman should be permitted to work as long as they like.

"We can't afford them," he used to say under corn, potatoes, tobacco, and little pigs," he told the closing session of the 74th annual meeting of the American Public Health Association.

Dr. Klumpp said that in the past medical scientists have been more preoccupied with the diseases of youth and childhood, but that as a result "we now have an adult population that is larger in proportion than it has ever been before."

It promises to be even larger as the years go by, he said, and by 1980, the 45 years of age and over group will comprise 40.3 per cent of the population with the 65 year old group at 21,000,000 or 14.4 per cent.

He said that scientists should go after other diseases as heart disease, coronary thrombosis, nephritis, arthritis and cancer—which are prevalent in the older-age groups.

Dr. Klumpp also warned of new problems arising out of the invention of new labor-saving devices which would permit on a scale never dreamed of before."

Just the same, he insisted, those in the older groups should be permitted to continue to give their wisdom and mature judgment as long as they are able to do so.

"I am content with opt-

ate dreams of future achievements," he said, "but as we grow older the realities of life are more clearly seen and less easily denied, and as we approach 50 to 60, we can no longer derive solace from our pipe dreams of future achievements."

LIFE WAS BENT

Attu, westernmost island of the Aleutian chain, is the farthest west of all United States possessions. It is isolated, but it is in the western hemisphere, but international law bent the international dateline to the west of the island, so that it would have the same time schedule as the rest

ABANDONED IN TAXI—Montreal police are seeking the parents of this baby who was abandoned in a taxi on Wolf St., in Montreal. The child, seen with a nurse, is being cared for in a hospital while efforts are being made to establish its identity.

—SO VERY TRUE

One of two girls in a subway train was looking at a newspaper.

"I see," she remarked presently to her girl friend, "that Mr. So-and-So, the octogenarian, is dead. Now, what on earth is an octogenarian, anyhow?"

"I'm sure I haven't the faintest idea," replied the other girl. "But they're an awful sticky lot. You never hear of one but he's dying."

A device has been developed in Australia which automatically makes a scale map of terrain over which it is rolled.

LIFE'S LIKE THAT**WORLD HAPPENINGS BRIEFLY TOLD**

Southwestern Alberta sugar beet growers received \$100,000 for their 1945 crops, it was shown.

The Swedish Academy has awarded Hermann Hesse of Switzerland the Nobel Literary Prize for 1946.

Alberta's 1946 wheat crop has been estimated by the provincial department of agriculture at 137,000,000 bushels.

At Sept. 30 deserters from the British army of the Rhine totalled 472, War Secretary Bellenger announced.

During the war the British army used 40,000 horses, 120,000 mules, 15,000 bullocks, 16,000 camels, 5,000 dogs and 15,700 horses.

As a reward for saving hundreds of Christmas puddings threatened with destruction by fire 20 Bath firemen received a pudding each.

The Royal Military College at Sandhurst, England, is to be known as the Royal Military Academy, Sandhurst, with university status.

The Japanese government will take over operation of several coal mines to determine whether nationalization will increase lagging coal production.

Reflecting improvements in shipping facilities, Argentine corn again is imported into Canada in large quantities, the Dominion Bureau of Statistics reports.

CAMPUS QUEEN—Campus queen of western Canada is Marion Albert, 17, University of British Columbia, who was chosen from among three contestants in Vancouver by a judge from Seattle, Wash. Marion, the youngest and tallest competitor, a brunette, was chosen as 5,000 in Vancouver watched the competition which had two entrants from each of the universities of British Columbia, Alberta and Manitoba and Regina, and Saskatchewan. The contest was the result of a dispute over which campus had the prettiest co-eds.

WORKED TOGETHER 55 YEARS

MILFORD, Mass.—Some sort of a record might be claimed by two octogenarian bakers who have worked side by side for 55 years without a cross word—or a vacation.

'SITE IS SELECTED

Norway Erecting Monument To Memory Of Franklin D. Roosevelt

The site for Norway's monument to the memory of Franklin D. Roosevelt has now been selected. The committee has chosen a high point not far from Oslo's city hall overlooking the Oslo Fjord. Close to the proposed site rises the most famous landmark: the historic Akershus fortress. Over 55,000 kr. have already been donated toward the monument which is expected to cost over 200,000 kr., and a committee of outstanding public figures has announced the opening of a competition among Norway's most famous sculptors.—Norway Information Service.

PIGEON ATTACKS BABY

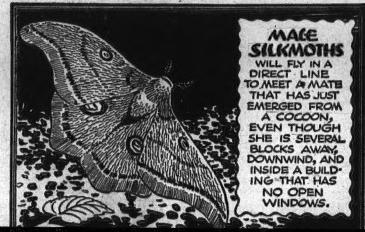

VICTORIA, B.C.—A tame pigeon which attacked a sleeping three-month-old baby, pecking at the infant's face and pecking at its tongue until it bled, was killed by the baby's father, C. Mireau, as it circled for another attack.

MAGIC Honey Pound Cake

1 1/2 c. seedless raisins
1/2 c. honey
3 eggs, well beaten
2 1/4 c. sifted all-purpose
flour
1/2 c. milk
1/2 c. butter
1/2 c. sugar
1/2 c. flour
1/2 c. baking powder
1/2 c. salt
1/2 c. vanilla extract
1/2 c. lemon extract

Rinse raisins drain; dry on towel-cut fine with scissors. Work shortening with spoon until fluffy and add sugar. Add eggs, one at a time, beating well after each egg. Add flour, alternately with milk, beginning with flour. Blend well. Add raisins, vanilla and lemon extract. Spoon until smooth. Add extracts, raisins and mix well. Blend. Bake in greased, lightly floured 9" x 9" x 3" pan at 350°F. for 2 hours.

**OUR COMPLETE SHORT STORY—****A Better Place**

By VICTOR DI CASTRI

Copyright
Wheeler Newspaper Syndicate

JACKIE worked feverishly on the trench with his friends as the fire belloved a few yards away. Grimly he wished with all the passion of his fifteen years that he had been sent to Reform School instead of to the Mt. View Forestry Camp to fight forest fires. "Those stinkin' old judges with all his cronyism about him," Jackie delinquent, treating me as if I didn't know what it was all about! Jackie fumed.

He looked up at the sun which was a red bull's-eye in the black sky beating into him the fact that it was nearly noon. The fire had not yet taken everyone in the camp below him. How else could you explain that he didn't have a friend in the camp except Dolly the pal' calf? And now even Dolly was gone. Oh yes, every now and then you'd still hear her bell. She was around here, seeking shelter from the fire but her chances of coming through the fire alive weren't worth peanuts even if the so-called best man in the Camp had gone into the roaring flames to bring her back. He saw the faces of the other boys, sweating, anxious faces. One of the fellas said, "Yeah, that's what happens when you make a pet out of an animal. You put 'em up against nature and they ain't got anything to fight with."

And there Higgins, the Camp Supervisor, expert, obsolete ammunition is being dumped in Georgian Bay 50 miles north of Sudbury. Soddy Bob, War Assets Corp., Madelaine Bay is seen with some of the munitions being loaded aboard the S.S. Northern for dumping into 480 feet of water. The ammunition being disposed of ranges from six-inch naval shells to flat anti-tank bombs.

Dolly, but Jackie knew now that he had added to his fear and that in similar situations he would try and be another Bob.

It was a wonderful feeling to go through fire and come out unafraid. Didn't God say going through fire cured you of something and prepared you for a better place?

SMILE AWHILE

During the Sunday morning sermon, a baby began to cry at the top of its voice, and its mother carried it toward the door.

"Shush," said the minister. "Your baby is not disturbing us."

The mother turned toward the pulpit and addressed the preacher: "Oh, he ain't, ain't he? Well you're a disturbing him."

Calling her husband into the kitchen, the worried housewife exclaimed in annoyance.

"Good gracious, Jack! How could you think of bringing that man Robinson home to supper when you know I'm fall cleanin'?"

"Hush, m'dear!" said hubby urgently. "He's the only man I know strong enough to help me move the dining-room side-board."

The door of the ladies' hairdresser's shop opened and in came a sleek-looking little man, twisting his hair nervously in his hand.

One of the assistants approached him.

"What can I have the pleasure—

"—she cooed.

"Er—could you spare a blond hair for my shoulder?" he stammered. "I want to make my wife jealous."

• • •

As they walked home together, Tom told Fred he was going to give his wife a serious talk on economy.

What did they met again next day, Fred asked:

"Well, did you give the missus that economy lecture?"

"I did," replied Tom.

"Any results?"

"Yes—er—I'm going to give up smoking."

• • •

Counsel was cross-examining a farmer.

"Now," he said, "don't quibble. Do you think a simple problem or not?"

"I do," replied the witness.

"Then tell the court this: If a farmer ploughed a field in five hours, how long would thirty men take to do the same field?"

"They couldn't do it."

"Why not?"

"Because the fifteen have already ploughed it."

• • •

"Oh mamma," exclaimed little Elizabeth, when the dessert was served, "how I wish you had told me this morning that you were going to have ice cream for dinner!"

"Why, dear, what difference would it have made?" asked mother.

"Oh lots!" replied the youngster, with a sigh. "I could have expected it all day, then!"

If takes 4,500 pounds of coal to make a new automobile.

**Forest Conservation****Is Of Greater Importance Than Placing Embargo On Lumber**

Sir Oliver Mowat made the north shore of Georgian Bay a haven of sawmill industry by putting an embargo on raw lumber. It went at the time to cities like Bay City and Saginaw in Michigan but the same north shore is far from being a hive of sawmill industry at this time says the Port Arthur News-Chronicle. It is most important for its ghost towns, however, was due to the embargo. It was due to cutting without regard to the future. It would appear therefore, that conservation, whether with or without embargo, is more important.

IMPORTANT MEAL

No matter how busy a mother may be, she will find that it pays in more ways than one, to serve a substantial meal to her husband each evening of the week. Department of National Health and Welfare, in stressing the value of a well-balanced, fresh, morning meal, suggest that this will save the mother a lot of trouble later, since "a well-fed child is a happy child" and will not require as much attention later in the day.

The fastest way to smoking pleasure!

Just One Advantage

Horse Will Run Away But Motor Car Doesn't Does

Those who pride of the "good old days" are wont to point out that a horse would take you home or its owner if you had something an automobile can never do. True enough, but on the other hand, a motor car doesn't need to be run away.

Anyone can remember the horse-and-buggy days recalls the occurrence of runaways with something akin to glee. When you got to them, but they were terrifyingly dangerous. A panic-stricken horse can become an agency of dire destruction.

Perhaps automobiles are superior in many ways, but at least they never ran away. Take the bit in their teeth and set off down the street at break-neck speed, out of all human control—Windsor Star.

"I'd like 11,506,651*
others to hear this"

"No post mortem!" warned His planarity at Ruth. "The name's ours. Besides, your husband looks as though he's been working."

"I have," said Bill. "Only I'd like the other 11,506,651 Canadians to hear this too. Today I got hold of some figures that made me proud of the business I'm in. We Canadians now own more than 10 billion dollars worth of life insurance. And moreover! During 1945 alone, the companies paid out over 650 million dollars in dividends and annuities to policyholders. And another 95 million dollars was paid to living policyholders through matured endowments, dividends, disability claims, annuities and cash surrender values. That's what life insurance is doing for us Canadians."

"The best way to benefit is to pay a modest premium, start managing it to collect, until it grows into comfortable returns. Countless families have thanked their stars for life insurance in time of need. Many, many others who are now building future security through their policies will be glad of it. But I want every living Canadian to realize the importance of Life Insurance."

Every life insurance dollar while waiting to be paid out to its claimant is working and growing in the hands of health, creating jobs and more goods for more Canadians. Of that dollar about 57 cents is now invested in Government bonds; 5 cents is laboring for municipalities; 20 cents is being used by the government to unite coast to coast; 8 cents is in farm and urban mortgages; another 5 cents is on loan to policyholders; 1½ cents is represented by real estate and 3½ cents is in cash and miscellaneous assets.

Life insurance not only grows in the scope of its protection, year after year, but is continually being employed for socially desirable purposes.

A message from the Life Insurance Association of Canada and their agents.

Christmas Seal your Christmas Mail.

Famous last words: "This windshield is pretty dirty, but I can still see okay."

People who put cigarette ashes in their coffee cups should be served their coffee in ash trays.

Born to Mr. and Mrs. Douglas McAndrew at the Perry maternity home on Sunday, Dec. 1, a daughter.

Then there was the fellow who started on a shoestring and worked his way up to a face slap.

George Short is back on the job following illness necessitating him being a hospital patient for a couple of weeks.

Mrs. J. Angus MacDonald left for Calgary on Tuesday to visit her son and daughter-in-law, Mr. and Mrs. R. MacDonald.

Salesman Sam says that after a man finds out that a woman is no angel... he tries to ascertain to what extent she isn't.

Mrs. J. R. Smith, who has been visiting Pennsylvania and other eastern states for the past three months, is expected home this week.

Right Rev. H. R. Ragg, MA, DD, Lord Bishop of Calgary Diocese, will visit the Pasg this weekend and will conduct Sunday services in the Anglican churches, at Blairmore at 11 a.m. and at Coleman at 7 p.m.

Mrs. George Maniquet and young son, who have been visiting Mr. Maniquet's parents, Mr. and Mrs. I. Rae, and other relatives the past two weeks, will return to her home in Dawson Creek next week.

Mrs. G. Tonge, of Courtenay, BC, arrived in town Wednesday night for an extended visit with her son and daughter-in-law, Mr. and Mrs. Reg Tonge. She is accompanied by her great-granddaughter, Miss Beverley Ball.

The war is over, but there remains one enemy at home which will not be defeated until the last germ is dead. Tuberculosis killed nearly 6,000 Canadians last year. Do your part to help stamp out this disease by buying Christmas Seals.

The subject at Central United church next Sunday evening will be "What shall we do with our gifts?" a pre-Christmas sermon. Special music will be provided by Mrs. Alice McKay and Mrs. McLeod. You are cordially invited to be present.

It is estimated that 60,000 people in this country have tuberculosis, nearly half of whom do not know they have the disease. They are endangering their lives and health of others with whom they come in contact. Christmas Seals finance the search for these "hidden" cases.

The unusual occurrence of a Calgary manufacturing plant shipping a product to the East took place recently when four large Vissac-jigs, used for the washing of newly-mined coal, were sent to the Acadia Coal Mines at Stellarton, NS, by the Dominion Bridge Company Limited and Riverside Iron Works Ltd.

Manufactured jointly by the two companies at their East Calgary plants, the jigs are box-like affairs, weighing about 15,000 pounds and worth approximately \$10,000 apiece. Two more, destined for the same company, are now in the progress of construction.

Calgary is the only place in Canada where the Vissac-jig is made. It was named after its inventor, Gustav Vissac, of Vancouver, formerly general manager of West Canadian Collieries and well known in western mining circles. Majority of mines in Alberta now use this jig, which has a washing capacity of 100 tons of coal an hour.—Calgary Herald

MANY ATTEND ELKS MEMORIAL SERVICE

A large number of brothers and friends attended the BPOE memorial service in the Elks hall last Sunday in memory of 29 members that have departed this life since the inception of the lodge 21 years ago.

The service included a few appropriate remarks by Exalted Ruler Bro. A. P. Bourne, and the memorial ritual by the officers of the lodge. After the opening ritual all joined in singing the odes, "Great Ruler of the Universe," which was followed by the hymn, "The Old Rugged Cross," with the invocation recited by PDDGER Bro. Geo. McFann.

Vocal solos and duets were rendered by Mr. A. McKay and Mrs. J. R. McLeod, and an inspiring and impressive memorial address given by Bro. W. H. Chappell. The service came to an end with the closing ceremonies of the lodge officers.

"V.W." —

An alert copy-writer on a paper couldn't believe it—the reporter's story of the theft of 2,025 pigs.

"That's a lot of pigs," he growled, and called the farmer to check the copy.

"Was it 2,025 pigs that were stolen?"

The victimized farmer replied: "Yeth."

"Thanks," said the copy-writer and corrected the copy to two sows and 25 pigs.
